

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims**

1. - 45. (Canceled)

46. (New) A code division multiple access (CDMA) user device comprising:

a transceiver configured to communicate over a plurality of wireless channels with a base station;

the transceiver is further configured to transmit a request to the base station indicating an amount of data in a buffer and associated priority information; and

the transceiver is further configured to receive a signal with an uplink resource allocation in response to the request.

47. (New) The CDMA user device according to claim 46 wherein the priority information is transmitted in order to define which session queue to enable or disable.

48. (New) The CDMA user device according to claim 46 wherein the amount of data in the buffer is used to calculate urgency factors for the uplink resource allocation or an uplink resource deallocation.

49. (New) The CDMA user device according to claim 48 wherein the urgency factors are used to determine the uplink resource allocation on a per user device basis.

50. (New) The CDMA user device according to claim 48 wherein the uplink resource allocation in response to the request is assigned using the urgency factors.
